

ENGINE STOP LEAK

EXTENDED LIFE

Technical Data Sheet

V170303

ELIMINATES OIL LEAKS WHEN ADDED TO MOTOR OIL

iLast Engine Oil Stop Leak is a specially formulated oil additive designed to reduce or eliminate oil leaks from old worn seals and gaskets that have shrunk due to temperature or wear. Elastomeric seals contacted by hot oil tend to shrink, harden and become less pliable; as a result oil begins leaking out. One alternative is to replace all the leaking seals; another is to add iLast Engine Oil Stop Leak. iLast Engine Oil Stop Leak contains a synthetic seal swell additive to swell seals back to their original size and helps them regain pliability. This product contains no solids that can plug oil filters and small engine oil passageways.

**MADE
IN USA**

12-Ounce - FPiL0013

Typical Properties

Flash Point	>200 °F
Boiling Point	>400 °F
Specific Gravity	.9
Appearance	Clear, Red Liquid
Odor	Mild Petroleum
Flammability	Low Flammability
Plastic Safe	Yes
Propellant	Not Applicable

Typical test data are average values only. Minor variations, which do not affect performance, may occur. As always, you should consult your owner's manual to verify the proper fluid recommendation for your particular vehicle.
